

## About Us

## Description

## Revolutionizing Livestock Farming in Africa

Welcome to Dairyverse & ViÃ©hpro.

We are not just a supplier; we are partners in your investment.

For too long, Kenyan farmers have struggled with â??silent heats,â?? low milk yields, and stunted growth. We exist to change that narrative.

Backed by science and the power of Restorex® Technologies, our mission is simple: To turn every "ugly cow" into a high-performing asset. Whether you are battling fertility issues or chasing 25+ Liters of milk, our certified solutions (Booster+, Fertility+, Tranzpro) deliver visible results in days, not years.

## Our Story

### From Frustration to Profit

Farming should not be a gamble. We realized that many investors were losing millions due to poor nutrition and lack of technical know-how. That's why we created the Dairyverse ecosystem.

Today, we offer a complete 360° solution: Vi@hpro Industries for premium supplements, Dairyverse Academy for education, Dairyverse.net as a marketplace and Dairyverse Consulting for expert farm management.

## Testimonials

Some feedback from our clients

**We were able to Inseminate 23 cows and heifers within a month courtesy of Dairyverse solutions!**

Mr. Charles Maoga - Nyamira

Dairyverse helped us increase our monthly milk yield from 3,300 Litres to 7,100 Litres.

Mr. Timothy T - Githunguri

After using Tranzpro® in steaming up, my cow was able to produce over 28 Litres of milk for the first time.

Mr. Victor Wambugu - Nyeri
