**LAMA PLUS<sup>®</sup>**  
growth rate means more profits!

Increases achievement of high average daily weight gain (ADG) and maximum stunted growth

Reduces post-weaning stress and improves appetite

Increases growth rate hence improves productivity

Increases calf's immunity

Counters delayed onset of heat!

Use in calves aged 3 to 12 months

Use 10 grams (2 Tablespoons) to 15 grams (3 Tablespoons) to 20 grams (4 Tablespoons) daily and mix with milk

High protein & energy supplement

Can be mixed with milk or meat

Store in a cool dry place

Protect from direct sunlight

**BOOSTER+<sup>®</sup>**  
Realise your cow's full potential!

Benefits:

1. Increases milk yield by upto 500L (3 times)
2. Enhances attainment of high milk production in lagging high-yielders
3. Fast recovery of previously ill cows
4. Counters delayed onset of heat in milking cows
5. Improves body condition and counters stunted growth

Directions/usage:

- Suitable to dairy cattle of all ages
- This package is used for 18 days
- Add 10 grams (2 Tablespoons) to the practical concentrate daily and mineral licks during feeding
- This is a high protein & energy supplement
- Not withdrawn from milk or meat

Store in a cool dry place  
Protect from direct sunlight

Composition:  
Crude Protein (CP) - 18%  
Total Digestible Nutrients (TDN) - 65%  
Crude Fibre (CF) - 16%  
Enriched with Vitamins, Yeast, High Energy

verse

Embraced across Africa!

By all dairy investors! Don't be left behind. These are the silver bullets in realisation of your cattle best growth, production and reproduction potential!

[Ndamaplus](#) helps your calf aged 3 -12 months meet average daily weight gain and thus mature faster among many other benefits!

The following are its benefits;

- It Enhances achievement of average daily weight gain and counters stunted growth.
- Counters post weaning stress and improves appetite.
- Enhances faster growth rate and early maturity.
- Boosts calf's immunity.
- Facilitates timely onset of heat.

[Booster](#) helps you realise your cow's full milk-yield potential. She will hit peak production and fix poor body condition and silent heat and delayed onset of heat in milking herd!

It has the following benefits,

- It increases milk-yield and enhances achievement of peak production in cows.
- Enhances attainment of high milk production in lagging high yielders.
- Fast recovery of previously ill cows.
- Counters delayed onset of heat in milking cows.
- Improves body condition and counters stunted growth.

[Fertility](#) This is the solutions to delayed onset of heat and silent heat in heifers! The following are its benefits;

- It counters delayed and silent heat.
- Prepares heifers for prominent heat signs.
- Boosts fertility and enhances conception.
- Counters reproductive challenges like dystocia and retained afterbirth.

[Tranzpro](#) Works on your incalf cow 18 days towards calving and 18 days after calving. This product enhances multiplication your cow's udder cells, steams her up, enhances her appetite and ensures that she hits peak production early!

- Improving udder health and getting pregnant heifers ready for high milk production after giving birth.
- Preventing the risk of retained afterbirth condition.
- Boosting the appetite of cows, which usually decreases during early lactation.
- Helping cows reach peak milk production faster.
- Improving the recovery rate of sick cows that have recently given birth.

We are committed to help you create more wealth through advanced livestock production technologies!

You will only be able to achieve this goal through proper feeding of your dry cow. Ensure your dry cow is provided with a well balanced ration that incorporates good quality "dry cow" minerals. Furthermore, make sure that the dry cow's metabolism takes place properly through use of [Tranzpro](#) 18 days before calving. By so doing, your calf will have enough mineral reserves at birth and this will pioneer a healthy life!

We will expound more on the mineral deficiencies and why proper metabolism is important in your dry cow in our next article. Read full article, [here](#).
