Fertility+® (Cure Silent Heat & Boost Conception)

Description

Cure Silent Heat (Joto Baridi): The Fertility+ Solution

Fertility+® is an advanced high-protein, energy, and trace element supplement specifically designed to cure Silent Heat (Joto Baridi), stop repeat breeding, and ensure your cows and heifers get pregnant on time.

The Reproductive Challenge: Why Your Cows Aren't Cycling

Every day a cow stands empty is money lost. Long calving intervals, missed heat cycles, and repeated AI services eat directly into your profits. When a cow's nutritional reserves are depleted, her body shuts down reproduction to survive, leading to silent heat and failed pregnancies.

Enter Fertility+®: The Proven Reproductive Solution

Powered by our proprietary RestoreX Technology, Fertility+® delivers the exact nutritional boost your cow's reproductive system needs to wake up and function perfectly. We have skipped the complicated science so you can focus on the results.

What RestoreX Technology Does for Your Herd's Fertility:

Triggers Strong, Visible Heat: Say goodbye to Joto Baridi. Fertility+® provides the targeted high energy and trace elements needed to restart the reproductive cycle, giving you clear, unmistakable heat signs so you know exactly when to serve her.

Stops Repeat Breeding: It strengthens the reproductive tract, creating the ideal environment to hold a pregnancy and drastically improving your conception rates on the first service.

The Perfect Womb Cleanse: When started 45 days after calving, Fertility+[®] acts as a powerful cleanse, repairing the reproductive system and ensuring she is ready for her next cycle without costly delays.

Simple, Effective Application of Your Fertility Supplement

We have simplified the process into an easy-to-use routine. No special equipment is required.

Daily Dosage: Mix 50 grams (2 tablespoons) thoroughly into her morning dairymeal or maizegerm every day.

The Restore+ Fertility Protocol: For cows and heifers struggling to show heat, follow our full 36-day protocol (requires 2 Standard Packs). Most farmers see strong heat signs within 18 to 36 days of consistent use.

When to Stop: Continue feeding the daily 50g dose until she has been served and you are awaiting pregnancy confirmation. *(We prefer completion of the open pack).*

Pack Sizes to Fit Your Herd

Standard Pack (900g): Lasts for 18 days.

Minipack (0.5kg): Lasts for 10 days.

Trust the Source

Fertility+[®] is manufactured by Dairyverse Agritech Ltd. We are not just sellers; we are dairy consultants deeply embedded in the industry. We understand that a cow that isn't calving isn't paying her way.

Don't waste another straw of semen on a cow that isn't ready. Bridge the nutritional gap and get your herd breeding profitably again with RestoreX Technology today.

Frequently Asked Questions about Fertility+[®]

Q: How soon will I see strong heat signs?

A: If you follow the Restore+ Fertility Protocol (50g mixed in feed every morning), most farmers see strong, visible heat signs within 18 to 36 days. Consistency is key ensure she gets it every single morning.

Q: Why is my cow experiencing silent heat (Joto Baridi)?

A: Silent heat is almost always caused by nutritional deficiencies; the cow's body shuts down reproduction to save energy for survival. By bridging that gap with the high protein, energy, and trace elements in RestoreX Technology, Fertility+® restarts the reproductive system.

Q: How long should I continue feeding Fertility+®?

A: Continue the daily 50g dose until the cow has been successfully served by AI or a bull, and you are waiting for pregnancy confirmation.

Q: When is the best time to start using Fertility+® on a cow that recently calved?

A: You can start using it as a "womb cleanse" exactly 45 days after calving. This prepares her reproductive system early so she is ready to cycle and conceive without long delays.

Q: Where is Fertility+® manufactured?

A: You are buying local quality with international standards. Fertility+® is proudly manufactured by **Dairyverse Agritech Ltd**, ensuring the formula is tailored specifically to solve the reproductive challenges of East African livestock.
